Profile

I am currently a graduating BS Computer Engineering student from Adamson University. I specialize working with / creating software applications. I am mostly comfortable with web development, but I have experience with mobile and desktop development.

Relative Experience

Outsourced Software Programmer @ Sistema Ammiris

September 2018 – Present

- Write scripting application using Python to automatically transfer data from a CSV file to a PostgreSQL Database.
- Perform manual SQL queries on PostgreSQL database to check if data is moved / transferred successfully.

Web Developer Intern @ Knowledge Channel Foundation

July 2020 – Aug 2020

- Designed the frontend visuals of a project management web application for interns and administrators using Adobe XD.
- Translated the frontend design to code and connected the frontend code to backend code with Laravel as main framework.

Projects

- **COVID-19 Tracker** – A web app for monitoring the total cases of COVID-19 all around the world. Created using Python and VueJS.
- **KCHPLATFORM** – A project management web app I created during my internship at KCh, notable features include a messaging, notification, and file upload systems. Created using Laravel as main backend framework.
- **Expense Tracker** – A simple expense tracking web application with charts for visualizing data. Created using Python and VueJS

Skills
